Alvaro Febryan Angkawijaya

Student at SMA Katolik Yos Sudarso | AI Enthusiast | Full-Stack Developer | Web Architecture
West Karawang, West Java, Indonesia

Summary

I don't just write code; I like to build complete systems. As a full-stack developer, I enjoy the balance of creating intuitive user interfaces while structuring robust back-end architecture. I am an independent thinker and a perfectionist who loves taking a raw idea and building it out entirely on my own. My technical experience ranges from software engineering to cloud deployment—highlighted by my favorite project, Cosmic Ops, an astronomy game application I deployed on Cloud Run for the Google Developers Vibe Coding event. Alongside my development work, I serve as the Head of Technology and English Ambassador for my school's student council (OSIS). In this role, I manage our public digital footprint on YouTube and Spotify, and handle the technical infrastructure and live streaming setups for major school events. Whether I am debugging a back-end script or optimizing a cloud-hosted web app, I bring a highly adaptive, detail-oriented approach to problem-solving. I am actively seeking student web developer roles and technical projects where I can build, deploy, and scale digital experiences.
